

Database Systems Final Project Proposal Format

1. Title Page

- Project Title
- Group Name
- Names of group members
- Course: CTFDMBSL - Database Systems
- Date of Submission

2. Introduction

- **Project Overview:** Explain the scenario or environment where the system will be used (e.g., school, business, clinic, etc.), Brief description of the system/project.
- **Problem Statement:** What data management issues or inefficiencies exist? , What problem or process it aims to improve.
- **Objectives:**
 - General Objective (What the project will achieve overall) , Overview of the database solution (type of system, users, benefits)
 - Specific Objectives (Detailed goals like record keeping, report generation, relational database design, etc.)

3. Project Description

- **Project Scope:**
 - What your database system will cover (e.g., inventory management, student records)
 - Inclusions and exclusions
- **System Users:**
 - Who will interact with the system (admin, staff, customers, etc.)
- **Main Features:**
 - Tables/entities to be used (e.g., Students, Products, Sales)
 - Key functionalities (e.g., CRUD operations, searching, reporting)
- **Tools and technologies to be used:**
 - DBMS (MS SQL Server)
 - Frontend interface (if applicable, e.g., PHP, Java, C#)

4. Timeline

- Table activities with dates and deadline

5. References

- List of books, articles, or websites used as references
